

transportState\_t

```
graph BT; transportSM_t[transportSM_t] -.->|currentState| transportState_t[transportState_t];
```

The diagram illustrates a relationship between two data structures. At the top is a white rectangular box labeled 'transportState\_t'. At the bottom is a gray rectangular box labeled 'transportSM\_t'. A vertical dashed purple line connects the two boxes, with a solid purple arrowhead pointing upwards from the gray box to the white box. The text 'currentState' is positioned to the right of the dashed line, indicating the variable or field that points from the state machine to the state structure.
